

# WordPower™ for ECO2

from Inman Innovations, Inc.

**WordPower** vocabulary has been upgraded for PRC's ECO2™. **WordPower** and **Picture WordPower** for the ECO are upgraded vocabularies that have been programmed to take advantage of the newest hardware and software innovations from Prentke Romich. The ECO2 is an integrated AAC device. **WordPower** and **Picture WordPower** are sophisticated vocabularies that have been designed to make speech generation easy and natural. In addition to these logical and intuitive vocabularies, **WordPower** and **Picture WordPower** now serve as the interface for the integrated ECO computer. The system operator can move smoothly between communicating with the device, navigating the internet, playing games on the computer, sending e-mail, and generating documents using **WordPower** vocabularies.

WordPower™ for ECO2 includes nine vocabulary options. Six will be found when you load the entire device. The other three vocabulary options are in the "Extra vocabulary" folder on your CD. These generative language systems have been customized for a variety of users including direct selectors and scanners. This powerful system facilitates fast and efficient communication for non-speaking individuals in a short period of time.

**WordPower and Picture WordPower utilize the powerful and fast dynamic screen technology available on PRC's ECO2.**

**Nine vocabulary arrangements are included for 144, 84 and 60 locations.**
